WALLSCAPES

Boasting spectacular landmark locations in major metropolitan cities, Wallscapes are elaborate ads that are either painted or attached directly to exterior building surfaces. Wallscapes provide excellent exposure in prominent downtown urban areas and are designed for long-term use.

WALLSCAPE BENEFITS:

• Wallscapes are large advertising structures that are out of the ordinary.
• They are seen by pedestrians and vehicular traffic in major cities.
• Wallscapes are visible from a distance on commuter and tourist routes on interstates and major highways.
• Add eye-catching special effects such as neon tubing, fiber optics, hydraulic movement, video screens, three-dimensional extensions, incandescent lamps, strobes and more to make a huge impact in major metro areas.

COMMON SIZING:

Wallscapes are a variety of unique shapes and sizes to fit the exterior space of the buildings where they are located.

MATERIAL:

Wallscape ads can be hand painted directly on the wall as a mural, printed on vinyl (special open weave) and securely attached to the wall using grommets, or printed on special adhesive-backed vinyl and adhered to the wall.
